

Young people bring colour to railway station.

Young people from **Dolwyddelan Youth Club** run by **Conwy Youth Service**, recently participated in an environment project to bring more colour to Dolwyddelan railway platform. Members designed and built three wood planters from scratch. Using a variety of skills such as design, measuring, cutting, drilling, assembling the parts and finally planting the flowers. Young people said:

“This was a fun way of giving something back to our community”

“I really enjoyed using the drill☺”

“The funniest thing about this project was measuring the wood and drilling it with a drill”

The youth club runs every **Wednesday** night during term time **18:00 – 20:00** for young people aged 11-25 at the **Pavilion, Dolwyddelan** and is a very popular and well attended youth club, with various sporting, cooking and arts & crafts activities delivered in Welsh and English.
