

## ILD ENGINEERING, PONT-Y-PANT

You might have noticed over the last few years, a new building going up in Pont-y-Pant. This is the new workshop of ILD Engineering, a metal fabrication and engineering company run by me, Iwan Davies. ILD Engineering specialise in all manner of steel work, from domestic gates and railings, to precision engineering of structural steel, such as beams and steel framed buildings and cattle grids.

ILD was started back in 2010, initially operating from a disused farm building in Nebo, Llanrwst. Back in 2018, my family and I managed to buy Ty Llwyd, Pont-y-Pant with the aim of moving the business there. Planning permission was sought and approved in late 2019 and we then set out to build the new

workshop on the grounds of Ty Llwyd. The new workshop was completed in late 2021 and the business has now been successfully operating from Ty Llwyd for the last 18 months or so. The office next door to the workshop is still a work in progress but I hope to finish the work before the end of the year.

*If you have any metal fabrication needs or would just like to have a chat about a project and get some friendly advice, please pop in and see Iwan and his team.*

Bespoke birdfeeders and gates.
